

Let Us Not Lose Control - of the Aircraft That Is!

Every year countless aircraft depart from controlled flight, unfortunately many pilots do not regain control prior to impacting the ground, resulting in serious injuries or death. Henrik Vejlstup will present this eye opening safety seminar on preventing loss of aircraft control. We will review and discuss loss of control accidents and see how they could have been prevented.

We will also discuss UAS. To learn more about these topics and how to avoid a related accident, click on the link below and register TODAY.

Directions: The meeting will be held in the North Coast Air Hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
